

Table 1. Categorization of Identified QIs

Structure (n=108)	Process (n=140)	Outcome (n=46)
Filter life (n=102)	Small Solute Clearance (n=93)	Bleeding (n=32)
Blood flow (n=2)	Delivered dose (n=21)	VTE events (n=4)
Filter efficacy (n=2)	Downtime (n=15)	CRBSIs (n=3)
SCT training (n=2)	Interruptions (n=5)	Catheter colonization (n=3)
	Fluid management (n=3)	Catheter malfunction (n=2)
	Effluent volume (n=2)	Thrombocytopenia (1)
	Adherence to protocol (1)	Complications (1)

Table 1. Categorization of Identified QIs. The types of identified are listed above with the number of instances listed in parentheses. VTE – venous thromboembolic events; CRBSIs – catheter related bloodstream infections, SCT – specialized care team.
