

**Table 2. Relevance of Identified QIs**

Themes	Criteria	Number of QIs
Importance (n=144)	Important for CRRT prescription	36
	Important for CRRT delivery	33
	Important for CRRT monitoring	11
	Important for patient related outcomes	40
	Important for health economics	24
Scientifically acceptable (n=32)		32
Usability & Feasibility (n=17)	Useable and feasible	15
	Ability to integrate into an EMR	2

**Table 2. Relevance of Identified QIs.** The breakdown of the characteristics of the identified QIs as per the four criteria (importance, scientific acceptability, usability and feasibility) proposed by the United States Strategic Framework Board for a National Quality Measurement and Reporting System as discussed by the study authors.
